ABOUT ME

- » Computer and Communications Engineering student (class of 2027).
- » Organized and team-oriented, with a collaborative approach to problem solving.
- » Passionate about Machine Learning, AI, Embedded Systems, and Front-end Development.

EDUCATION

Alexandria National University

B.Sc. in Computer and Communications Engineering

◦ Expected Graduation: 2027 | GPA: 3.25/4.00

📅 2022 - 2027

📍 Alexandria, Egypt

SKILLS

- **Programming Languages:** Python, Java, C, MATLAB, SQL (MySQL), HTML/CSS/JavaScript
- **Technologies:** Machine Learning, Deep Learning Fundamentals, Embedded Systems (AVR), Flutter, Linux, Git & GitHub, Cyber Security Fundamentals, Computer Hardware
- **Soft Skills:** Problem Solving, Teamwork, Time Management, Communication

CERTIFICATIONS & TRAINING

- **Java SE: Programming 1** 📅 August 2024
- **Java SE: Programming 2** 📅 September 2024
- **MySQL Fundamentals** 📅 November 2024
- **Artificial Intelligence & Machine Learning** 📅 November 2025
- **Machine Learning Course, Route** (supervised & unsupervised models, hyperparameter tuning)
- **Deep Learning Fundamentals** (implemented models using TensorFlow)

EXPERIENCE

- **Internship at Alexandria Water Company** 📅 29 Jun – 12 Jul 2025
 - Gained exposure to professional workflows in a real-world engineering environment.
- **Computer Hardware Maintenance & Troubleshooting** 📅 7 Jul – 8 Sep 2026
 - Diagnosed and repaired hardware faults in laptops and desktop computers.
 - Performed component-level replacement, upgrades, and system assembly.
 - Installed and configured operating systems and drivers.

PROJECTS

- **Autonomous Car Parking System** *Embedded C, AVR (ATmega32A), Flutter, Dart, Bluetooth (HC-05)*
 - » 4th-year Embedded Systems final project: an autonomous self-parking car on the AVR ATmega32A with sensor-based parking logic, PWM motor control, and Bluetooth manual control.
 - » Built cross-platform remote control apps in Flutter for Android and Windows.
- **Java Banking System** *Java, Swing, file-based storage*
 - » Developed a fully functional banking system with a Swing GUI: account management, deposits, withdrawals, transfers, and transaction history.
- **Twitter Tweet Analyzer** *Python, scikit-learn, NLTK, TF-IDF, pandas, Matplotlib*
 - » Built a tweet analyzer that classifies sentiment across 4 classes on 74,000+ tweets (best: 97.8% validation accuracy with a Linear SVM).
 - » Applied topic modeling (LDA, NMF), KMeans clustering, and exploratory analysis to extract insights and visualize trends.
- **Portfolio Website** (live) *HTML, CSS, JavaScript*
 - » Designed and developed an interactive, space-themed personal portfolio website from scratch.
- **Yaarany** (College Project, Contributor)
 - » Contributed to a team college project hosted on GitHub.

ADDITIONAL INFORMATION

Languages: Arabic (Native), English (Advanced)

Interests: Machine Learning, AI, Embedded Systems, Front-end & Back-end Development, Flutter, Cyber Security (Red-Teaming, Penetration Testing, Bug Bounty; in progress)
